
Software Requirements Specification

Grocery Delivery Application

1. INTRODUCTION

This document outlines the complete requirements for a Grocery Delivery Application designed for wholesale-level users with features such as quick delivery, category-based browsing, cashback rules, product pricing logic, and wallet-based ordering.

1.1 Purpose

The purpose of this document is to define all functional and non-functional requirements for the grocery delivery application so developers and clients have a clear reference.

1.2 Scope

The application enables users to browse grocery categories, place bulk orders, view discounts, receive delivery options, interact via WhatsApp, and manage wallet-based payments.
